Dear friends!

I am glad to welcome you at the all-Russian Youth Educational Forum "Seliger-2014".

This platform unites the most initiative and talented people. Each participant has a chance to present and discuss his project or idea, to find an opportunity of its implementation. It means - to realize your intellectual and creative potential more fully.

Young, but already established lawyers and attorneys as well as representatives of human rights organizations have gathered here today. Moreover, the best students and post-graduate students of specialized universities with excellent recommendations are here today. It is up to you to determine the future of legal science and education. To uphold the norms and principles of constitutional and international law. The development of the legal culture of our society as a whole, and the future of the Russian state largely depends on your knowledge, responsible civic position, and deep personal decency.

Russia needs not only well-trained professional personnel, but also it needs creative, self-thinking people who can become masters of their own destiny and take responsibility for the fate of their country. I'm sure that you - young lawyers - belong to those people.

I wish you interesting communications, luck and perseverance in achieving your goals.

D. Medvedev
