Overview

Located on the site of "Qing Hua Yuan" in Haidian District, Beijing, Tsinghua University was founded in 1911, formerly known as a royal garden of Qing Dynasty. Tsinghua University is the prominent center for higher education and scientific research. The university holds the largest numbers of academicians affiliated with the Chinese Academy of Science and the Chinese Academy of Engineering, of the top disciplines on the whole, of the Key National Laboratories, of national awards in science and technology, of research funds, and also of articles indexed in SCI, EI and ISTP over the years. Tsinghua University ranks 14th in The Times Higher Education World University Reputation Rankings 2018.

From generation to generation, "Tsinghua People" are deeply influenced by the motto of "Self-discipline and Social Commitment", the maxim of "Actions Speak Louder than Words", and its academic atmosphere characterized by Preciseness, Diligence, Truth-seeking, and Creativity. In the past 105 years since its foundation, Tsinghua University has turned out 180,000 alumni, and many of them have become renowned scientists, engineers, technical experts, educators, artists, entrepreneurs and senior government officials. Chen-Ning (Franklin)Yang and Tsung-Dao Lee, winners of Nobel Prize in Physics, are both alumni of Tsinghua University. XI Jinping, President of the People's Republic of China, LIU Yandong Vice-primer of the People's Republic of China, HU Jintao,the former President of the People's Republic of China, and ZHU Rongji, the former Primer of People's Republic of China, are all graduates of Tsinghua University.

Currently, Tsinghua University consists of 19 schools with 55 departments, which cover a variety of academic fields such as sciences, engineering, liberal arts, fine arts, history, philosophy, economics, management, law, education and medicine.

The campus life of Tsinghua students is rich and colorful. There are more than 130 students' clubs and associations on campus, being classified into five categories such as Humanities and Social Science, Science and Technology, Public Welfare, Literature and Art, and Sports. They have been attractive and open to both Chinese and foreign students, thus enriching the student's campus life.

In fall 2016, more than 3,440 international students from 126 countries are studying at Tsinghua University, and 76% of the students are pursuing degrees, and 24% visiting for advanced studies, joint research, or Chinese language study. The numbers of the students from the Republic of Korea, United States, Germany, Japan, France, Canada, Malaysia, Singapore, Pakistan,Russia, Australia, Thailand, The UK, and Iran rank the top 15.

Tsinghua University has the largest number and the best quality of international graduate students among China’s universities. There are more than 1,200 international students pursuing Master’s or Doctoral degrees at Tsinghua, and many of them are graduates of world-famous universities such as Harvard University, MIT, Stanford University, UC-Berkeley, Oxford University, the University of Cambridge, and the University of Tokyo, etc.

International Master of Public Health (IMPH) Program
Research Center for Public Health of Tsinghua University

The Research Center for Public Health (TPHRC), Tsinghua University since 2013 has created a graduate level, interdisciplinary and cross-cultural degree focused on global public health. The International Master of Public Health (IMPH) Program is aimed at building a new generation of global public health leaders in the developing world through the participation of recognized faculty and expertise from across Tsinghua University and partners around the world. These English taught courses are specifically designed for public health officials, disease prevention and control specialists and health program managers from developing and developed countries, with the fundamental purpose of improving the health conditions and achieving health equity in developing countries. The program prepares students to address global health challenges and issues of health service delivery, health product accessibility and global health policy. The program has four specific objectives. Firstly, it is to develop students' capability in applying theories and analytical tools of the public health discipline. Secondly, it is to enhance their understanding of public health issues in China and the rest of the world. Thirdly, it is to improve their ability to judge major health problems and leadership skills in solving these problems. Lastly, it is to promote the expanded role of China in improving global public health by fostering a close relationship and cooperative network between faculty and students.
